

Sin JPA

Service

```
public List<Document> getAllDocuments() {  
    return documentRepository.findAllDocuments();  
}
```

Repository

```
@Query(value = "SELECT CLIENT_APP_ID, CLIENT_DOC_ID,"  
    + "PROVIDER_ID, SENT_AT, RECEIVED_AT"  
    + "FROM SID_DOCUMENT_ASYNC", nativeQuery = true)  
List<Document> findAllDocuments();
```

Con JPA

Service

```
public List<Document> getAllDocuments() {  
    return documentRepository.findAll();  
}
```

Repository

Ya no hace falta implementar SQL.
